

**PERMANENT
REPLACEMENT
COUPLING**

**For B&G and
Armstrong Boosters
and In-Line Pumps**

ALL-WAYS SUPERIOR ...

Design: Unitized construction eliminates all friction/wear points common to OEM couplers • Precision-tempered, spiral spring provides universal flexibility and compensates for any degree of shaft misalignment • Absorbs starting torque • Reduces load on bearings and seals.

Function: Friction-free design allows silent operation in both start-up and running modes • Dampens vibration • No chatter or squeal.

Ease of Installation: Compact shape and .001 oversize bore make installation quick and simple. Once secured to motor shaft, *Spiralink*TM slips readily onto pump shaft; no need for "third hand" to achieve alignment.

Versatility: Three *Spiralink*TM models replace 15 OEM parts—nine B&G and six Armstrong.

Life: With no friction points in contact, *Spiralink*TM will not wear out. Only a seized impeller can rupture its uniquely formed spring.

Warranty: *Spiralink*TM couplers are warranted to be free from defects in material and workmanship and are guaranteed against breakage when properly installed in equipment for which they are recommended. If a *Spiralink*TM coupler fails to perform as represented by the manufacturer, the user may obtain a free replacement or refund by returning it to the source with proof of purchase.

E.S. GALLAGHER SALES LTD.

Representing Manufacturers for Over Sixty Years

COST BENEFITS

- **SINGLE RETROFIT** eliminates future coupling replacement
- **EASY INSTALLATION** reduces labor hours and down-time
- **SUPERIOR FLEXIBILITY** extends pump life by absorbing torque load on bearings and seals
- **3-MODEL VERSATILITY** reduces coupler inventory up to 70%
